

# Lesson 64

## Comparisons, Pt 1

### Vocabulary

báanibel	to give and take [ban (give) + i (and) + bel (take/bring)] {SH}
duthel	be useful [duth (use) + el (make)]
duthele	no longer useful for its original purpose but still useful if repurposed [duthel (useful)]
lóothi	be black and white [loyo (black) + liithi (white)]
nóowid	be big and little
raduthel	be useless [ra- (NON) + duthel (be useful)]
shinóoya	be fertile; be creative [shin (two) + óoya (heart)]
sholalan	be alone in a crowd of people [sholan (alone)]
yéshile	be good and bad
zhethal	be fair; be just; be equitable [zhe (alike) + thal (good)] {AB}

In “báanibel,” “lóothi,” “nóowid,” and “yéshile” we meet a class of Láadan verbs that contain diametrically opposed qualities within the same word. These are indicative of a reality where something is not entirely one thing nor its opposite but a blending of the two; anything so described contains both opposites in one.

### Vocabulary Recap: Degree Markers

-hel	Suffix (verb): to a trivial degree
-hil	Suffix (verb): to a minor degree
-∅	Null Suffix: to a neutral degree; no statement about degree
-hal	Suffix (verb): to an unusual degree
-hul	Suffix (verb): to an extreme degree
-háalish	Suffix (verb): to an extraordinary degree

### Implicit Comparison

The culture embodied in Láadan does not foster competition to the same degree that those inherent in man-languages do. Consequently, comparatives do not come as easily in Láadan as they do in most man-languages. One way we *can* effect comparison is to *imply* a comparison.

To do this, we state that the two or more things being compared share a quality, each to a different degree. To this end, we use the same verb for each—but with a different degree marker for each. The difference in the degree markers will imply which is more intensely VERBed than the other—voilà, instant comparison. Of course, we could use the same degree marker for two or more of them; we would then be stating that they are equally VERBed.

**Form implicit comparisons from the supplied verb and nouns (to the degrees indicated); translate into English, both literally and colloquially.**

- 7 léli, hob (minor), ódon hi (unusual)
- 8 duthel, eyon (unusual), eróo (extreme), eri (extraordinary)
- 9 dazh, od (extreme), thom (extraordinary)
- 10 íthi, eril sháad with bodim (unusual), eril benem with bethesha (minor)
- 11 bú, Mázhareth (unusual), hothul betha (extraordinary)
- 12 bol, thosh sháaleya ril (trivial), thosh sháaleya bim eril (extreme)

In the answer provided for #12, did you note that the Auxiliaries as well as the Time Case markers are unnecessary? The construction “sháal # AUX” clearly marks a time, so the Time Case affix is not needed. And the fact that one is set in “sháal ril” (today) clearly indicates it’s in the present time, while the other just as clearly places the action “sháal bim eril” (four days ago)—clearly past, no Auxiliaries needed for either.
